Supplemental information	14				

The accompanying notes are an integral part of the consolidated financial statements.

1. NATURE OF OPERATIONS AND LIQUIDITY

Nouveau Monde Graphite Inc. (the "Company" or "Nouveau Monde" or "NMG"), was established on December 31, 2012. under the *Canada Business Corporations Act*. The Company specializes in exploration and evaluation of mineral properties located in Quebec.

On February 7, 2017, Nouveau Monde Mining Enterprises Inc. changed the name of the Company to ''Nouveau Monde Graphite Inc.''.

The Company's shares are listed under the symbol NOU on the TSX Venture Exchange. The address of the Company's registered office is 331 Brassard, Saint-Michel-des-Saints, Quebec, Canada.

As at June 30, 2019, the Company had a working capital of $9,069,811 and had an accumulated deficit of $24,583,124 and incurred a loss of $2,997,219 for the period then ended. Working capital included current tax credits receivable of $1,339,098 and cash equivalents of $15,277,487.

With the financing completed in June 2019 (described in note 13), management believes that the Company has sufficient funds to meet its obligations and planned expenditures for the ensuing twelve months as they fall due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company's ability to continue future operations and fund its exploration and development activities is dependent on management's ability to secure additional financing in the future, which may be completed in a number of ways including, but not limited to, a combination of strategic partnership, project debt finance, offtake financing, royalty financing and other capital markets alternatives. Management will pursue such additional sources of financing when required, and while management has been successful in securing financing in the past, there can be no assurance it will be able to do so in the future or that these sources of funding or initiatives will be available for the Company or that they will be available on terms which are acceptable to the Company.

2. BASIS OF PREPARATION ON THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements of the Company have been prepared in accordance with ''International Financial Reporting Standards' ("IFRS") as issued by the International Accounting Standards Board ("IASB ").

The consolidated financial statements for the reporting six-month period ended June 30, 2019 (including comparatives) were approved and authorized for issue by the Board of Directors on August 28, 2019.

3. SIGNIFICANT ACCOUNTING POLICIES

3.1 CHANGES IN ACCOUNTING POLICIES

IFRS 16 – Leases

On January 1, 2019, the Company implemented IFRS 16, "Leases" ("IFRS 16"), replacing International Accounting Standard 17, "Leases" ("IAS 17") and related interpretations. The standard introduced a single, on-balance sheet recognition and measurement model for lessees, eliminating the distinction between operating and finance leases. The Company implemented the standard using the modified retrospective approach. As a result, the Company's second quarter of 2019 results reflect lease accounting under IFRS 16. Under IFRS 16, the depreciation expense on right-of-use assets and interest expense on lease liabilities replaces rent expense, which was previously recognized on a straight-line basis in operating income under IAS 17 over the term of a lease. Prior year results have not been restated.

On adoption of IFRS 16, the Company recognized lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of IAS 17. As at January 1, 2019, the Company recognized a $682,268 lease liability related to previous operating lease, that are now considered debt obligations upon adoption of IFRS 16 (see note 7.2). These leases were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of January 1, 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on January 1, 2019 was 6.38%. The associated right-of-use assets were measured at the amount equal to the lease liability as at January 1, 2019 (see note 10).

As a result of the adoption of IFRS 16, the accounting policy for leases applied starting from January 1, 2019 as follows:

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

I. the contract involves the use of an identified asset;

II. the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and

III. the Company has the right to direct the use of the asset.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis. Short-term leases are leases with a lease term of 12 months or less.

4. ESTIMATES, JUDGMENTS AND ASSUMPTIONS

In preparing its consolidated financial statements, management makes a number of judgments, estimates and assumptions about the recognition and measurement of assets, liabilities, revenues and expenses.

Information about the significant estimates and assumptions that have the greatest impact on the recognition and measurement of assets, liabilities, revenues and expenses is presented below. Actual results may differ significantly.

Going Concern

The assessment of the Company's ability to implement its strategy by funding working capital and its exploration and evaluation activities requires the exercise of judgment. The estimates and assumptions made are reviewed regularly and are based on historical data and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Provision for asset retirement obligations

The Company's exploration activities are subject to a number of environmental protection laws and regulations. The Company accounts for management's best estimate of asset retirement obligations in the period in which the obligations arise. Costs actually incurred in future periods could be significantly different from these estimates. In addition, future changes in laws and regulations, timing of estimated cash flows and discount rates may impact the carrying amount of this provision.

Recognition of deferred tax assets and measurement of income tax expense

Management regularly assesses the likelihood that its deferred income tax assets will be realized. As part of this assessment, management must determine whether it is probable that the Company will subsequently generate sufficient taxable income to which such losses can be applied during the deferral period. By its nature, this assessment requires a great deal of judgment. To date, management has not recorded any deferred tax assets in excess of existing taxable temporary differences that are expected to reverse during the deferral period.

Impairment of exploration and evaluation assets

Evaluating facts and circumstances that demonstrate the existence of any indication that an asset may have depreciated or recover in value is a subjective process that involves judgment and often a number of estimates and assumptions.

If there is an indication that an asset may have depreciated or recover in value, the recoverable amount of the individual asset or the cash-generating unit should be estimated.

Tax credits

Tax credits for the current period and prior periods are measured at the amount the Company expects to recover, based on its best estimate and judgment, from the tax authorities as at the reporting date. However, there are uncertainties as to the interpretation of the tax regulations, in particular regarding refundable mining rights credits for loss and refundable tax credits on eligible exploration expenses, as well as regarding amount and timing of recovery of these tax credits. In order to determine whether the expenses it incurs are eligible for exploration tax credits, the Corporation must use a lot of judgment and resort to complex techniques, which makes the recovery of tax credits uncertain. As a result, there may be a significant difference between the amount recognized in respect of tax credits and the actual amount of tax credits received as a result of the tax administrations' review of matters that were subject to interpretation. uncertain. In the event of such a difference, an adjustment must be made to the tax credits for mineral prospecting expenses in future periods. It can take a long time for the tax administration to report its decisions on tax issues, thereby extending the tax credit recovery period. Mineral exploration tax credits that the Company expects to recover in a period of more than one period are classified as non-current assets. The amounts recognized in the consolidated financial statements are based on the best estimates of the Company and in its best possible judgment, as noted above. However, given the uncertainty inherent in obtaining the approval of the tax authority concerned, the amount of tax credits that will actually be recovered and the timing of such recovery may differ materially from accounting estimates. would affect the financial position and cash flow of the Company.

End of the period	5,357,957	3,308,141
Current portion	5,357,957	930,841
Non current portion	-	2,377,300

On December 21, 2018, the Company closed a financing with Investissement Québec for an aggregate amount of $4,665,000 through four loan offers for which the first of four portions of an amount of $3,361,788 ($943,000 short term and $2,418,788 long term) has been received while the second portion will be received in 2019 pursuant to Nouveau Monde's cash flow needs but subject to the achievement of conditions set forth in the loan offers. During the period ended June 30, 2019 the interest paid was $60,179 for the loans contracted with Investissement Québec.

The loans were secured by a first ranking mortgages for an aggregate amount of $4,655,000 charging the universality of its present and future claims of accounts receivables. The loans must be repaid at the latest by June 30, 2019 and June 30, 2020 respectively the short term and long-term loans. The loan totaling $943 000 and reimbursable in totality on June 30th, 2019 beared interest at an annual rate of 6.25% payable monthly during the loan term. The two other loans totaling $2,418,788 and reimbursable in totality on June 30, 2020 bear interest at an annual rate of 6.38% payable monthly during the loan term. Concerning the loan that was due on June 30, 2019 ($943 000 capital plus accrued interests), the final reimbursement was completed on July 2, 2019. No penalties or additional interests have been requested by the lender.

As at June 30, 2019, the non-current portion of the debt has been reclassified to the current portion of the debt.

During the second quarter ending on June 30, 2019, the company concluded a new financing agreement with its largest shareholder, Pallinghurst Graphite Limited, for a total sum of $2,000,000. This agreement was concluded on June 18, 2019 and requires a full reimbursement of the capital plus interest accrued at the latest one year later on June 18, 2020. The agreement bears interest at 9% annually and all accrued interests shall be paid at the end of the maturity date of the agreement which is on June 18, 2020.

As at June 30, 2019, the company paid out a total of $95 819 of interest to its lenders. On the other hand, the interest charge covering the same period totals $119,103.

9. INTANGIBLE ASSETS

During the year ended in December 31, 2018, the Company and Hydro-Quebec (HQ) signed a licence agreement by which the Company is allowed to use HQ's patented technologies for the micronization, spheronization, purification and natural graphite coating to serve the lithium-ion battery market. The Company paid US $2 million ($2,561,818) for the use of the patents which have different expiry dates between October 24, 2021, to June 7, 2028. The licence was capitalized as an intangible asset and will be amortized over the life of the underlying patents.

13.5 SHARE-BASED PAYMENTS

The Board of Directors determines the price per common share and the number of common shares which may be allocated to each director, officer, employee and consultant and all other terms and conditions of the option, subject to the rules of The TSX Venture Exchange.

All share-based payments will be settled in equity. The Company has no legal or contractual obligation to repurchase or settle the options in cash.

The Company's share options are as follows for the reporting periods presented:

	June 30, 2019		December 31, 2018	
	Number of options	**Average exercise price**	**Number of options**	**Average exercise price**

15. INFORMATION DISCLOSURE ABOUT CAPITAL

The Company monitors capital on the basis of the carrying amount of equity and loans is $46,694,297 as at June 30, 2019 ($26,963,492 as at December 31, 2018).

The objective of the Company's capital management is to preserve its ability to continue its operations and its program of acquisition, exploration evaluation and development of mineral properties. It manages its capital structure and makes adjustments based on economic conditions and risk characteristics of underlying assets.

The Company is not subject to externally imposed capital requirements unless the Company closes a flow-through financing for which funds should be reserved for exploration expenditures. Changes in capital are described in the consolidated statements of changes in equity.

16. FINANCIAL RISK MANAGEMENT

The Company is exposed to various financial risks resulting from its operations. The Company's management manages the financial risks. The Company does not enter into financial instrument agreements, including derivative financial instruments for speculative purposes.

The main financial risks to which the Company is exposed as well as its policies for managing such risk are detailed below:

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The Company manages its liquidity risk by using budgets that enable it to determine the amounts required to fund its exploration and evaluation expenditure programs. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market or other alternative forms of financing is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company. The Company has historically generated cash flow primarily from its financing and investing activities.

All of the Company's short-term financial liabilities in the amount of $8,748,129 ($6,716,583 as at December 31, 2018) have contractual maturities of less than one period and are subject to normal trade terms. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance of liquidity

With the financing completed in June 2019 (described in note 13), management believes that the Company has sufficient funds to meet its obligations and planned expenditures for the ensuing twelve months as they fall due. (see Note 1).

Credit risk

Credit risk results from the possibility that a loss may occur from the failure of another party to perform according to the terms of the contract. The Company's credit risk is primarily related to receivables and cash and cash equivalents. The receivables consist mainly of the refund of the goods and services tax receivable from the governments of Canada and Quebec, as well as tax credits receivable from the Government of Quebec. Management mitigates credit risk by maintaining cash with Canadian chartered banks.

17. FAIR VALUE MEASUREMENT

Financial instruments measured at fair value

The following presents financial assets and liabilities measured at fair value in the statement of financial position in accordance with the fair value hierarchy.

This hierarchy group's financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly;
- Level 3: inputs for assets or liabilities that are not based on observable data (unobservable inputs).

Investments in shares measured at fair value in the statement of financial position as at June 30, 2019, and December 31, 2018, are classified in level 1. For all other financial assets and liabilities, their net carrying amount is a reasonable approximation of fair value given their relatively short maturities.

18. COMMITMENTS

The Company is partially financed through the issuance of flow-through shares and, according to tax rules regarding this type of financing, the Company is engaged in realizing mining exploration work.

These tax rules also set deadlines for carrying out the exploration work, which must be performed no later than earlier of the following dates:

- Two periods following the flow-through placements;
- One period after the Company has renounced the tax deductions relating to the exploration work.

However, there is no guarantee that the Company's exploration expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard, refusal of certain expenses by the tax authorities could have a negative tax impact for investors.

In 2018, the Company received $2,302,336 following flow-through placements for which the Company renounced tax deduction.

19. SUBSEQUENT EVENTS

On August 20, the Company announced that it has secured a $4.25M technology commercialization grant from federally-funded Sustainable Development Technology Canada (SDTC) program. The grant will be used to build a value-added graphite purification processing facility to be located in Quebec. The plant will be the first phase of a commercial facility that will produce spherical graphite products for the North American market
